Continue the Struggle To Re-Educate Our People. The Enemy Is Ignorance!

For too long, we have allowed our great scholar warriors to be vilified in the media and disrespected by those who have no desire to see us truly educated, and our minds liberated.

Dr. Frances Cress Welsing is famous for the *Cress Theory of Color Confrontation*. She is also the author of the seminal book titled *The Isis Papers: The Keys to the Colors* (1991). It was one of the first books I read that raised my mind into a new level of racial consciousness.

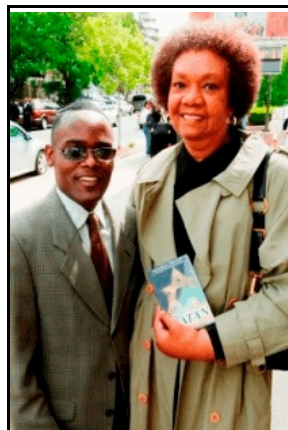

Like many of you, instinctively I knew that there was something innately different between Caucasians and we who are the Original People of the Earth. My parents taught me the truth and the evidence is all around us, however, until I read her book, I was unable to effectively describe the reality of our different natures to others.

Shortly after completing "The Isis Papers" I remember writing a paper titled "Do Whites Fear Genetic Annihilation?" for a sociology class. My instructor was in her early 30s and a Buddhist. Not that her religion has any relevance to this issue, however, this may explain why she appeared to be more open to

viewpoints that were considered outside of the mainstream.

In the research paper, I came to the conclusion that whites did have a fear of genetic annihilation, and for good reason. From the class discussion it was apparent that the clear majority agreed both white and black.

The interesting thing is that the sociology professor wrote a comment on my paper which

Ashahed M. Muhammad with Psychologist & Author Dr. Frances Cress - Welsing in Washington, DC.

read "Yes, I think we do." She agreed with the premise and the conclusion.

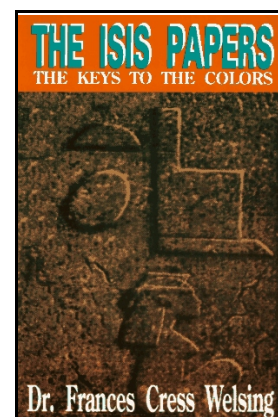

Surely, the right-wing reactionaries will respond to this admission on her part as a part

of the left-wing liberal bias on college campuses across America.

I think that she was one teacher with the ability to change the minds of others by accepting and teaching the truth.

I say all of that to point out that little did I know, some 15 years later, I would have the great honor of presenting Dr. Frances Cress Welsing with a copy of my book.

This is an example of what can happen when you do your part to fight for the mental liberation of your people. There will always be those with the desire to spread truth who will pick up the mantle, and continue to wage war against our deadliest enemy....ignorance.
